Yokohama Today

Yokohama: Leading Japan into the Future

Since the opening of its port in 1859, Yokohama has been prosperous as a place of exchange for people, cultures and goods from around the world while cultivating an open, enterprising spirit. It is also where modernization of Japan originated and has been developing as a city that is open to the world. Even today, Yokohama is growing as an international city with a population of 3.77 million people. Yokohama has a highly developed urban environment required for business, including one of the largest international trading ports in Japan, a high degree of accessibility from various parts of the Tokyo metropolitan area such as the re-expanded, internationalized Haneda Airport, green living environment, competent human resources and the extensive market of the Tokyo metropolitan area. Not only a perfect base for business, Yokohama is a vibrant, entertaining city that is extremely popular with both domestic and overseas tourists, and a favored site for conventions. In this publication we focus on Minato Mirai 21, a remarkable initiative.

Especially, Minato Mirai 21 district is now firmly established as an outstanding business environment that also offers fascinating glimpses of history and stunning waterfront scenery. Minato Mirai 21 is already one of the strongest people magnets in Japan, and yet it is still a work in progress. Future plans include a greater focus on business and commercial entities, accompanied by innovative creation facilitated by human exchanges. Our aim is to shape an environment in which an urban culture is nurtured by making full use of the port's historical assets and the area's cultural and musical facilities.

Key Data on Yokohama

| | | |
|--------------------------------------|-----------------------|---------------------|
| Area | 438.01km ² | [January 1, 2025] |

Latest information on Minato Mirai

Towards the "Future" of Minato Mirai

The Minato Mirai 21 district has been under construction for 40 years, and more than 94% of the district has already been developed. In addition to offices and commercial facilities, it is home to research and development centers, music facilities, museums and other facilities, and has grown into an area that attracts people from all sorts of fields.

From the era of construction, we are now moving on to the next stage. Towards the "future" of Minato Mirai, we will create and imbue excitement and value by combining the strengths of people in a variety of professions. Here are four initiatives we are currently undertaking.

Theme① Open Innovation

An initiative to support the creation of new technologies through exchange between local companies by taking advantage of the concentration of R&D centers, start-up companies and universities.

We will hold the "YOXO FESTIVAL", where you can experience innovation, and have opportunities to feel the excitement of the future with new technologies while touring the city.

Theme② Music Port YOKOHAMA

An initiative to create a city overflowing with music through music and other facilities.

Information on performances and interviews with people involved in the music industry are posted on the website, and musicians of various genres perform throughout the city. In addition, "OTO-GIFT", a service that offers discounts on food and beverages by presenting live concert tickets, has been launched.

Key Data on Minato Mirai 21

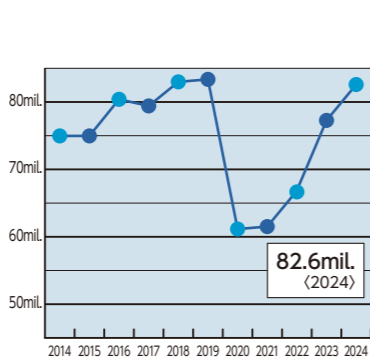

Effects of the Minato Mirai 21 Project

| | |
|--------------------------------|--------------|
| Companies | 2,010 |
| International conferences held | 77 |
| Municipal tax revenues | ¥20.5billion |

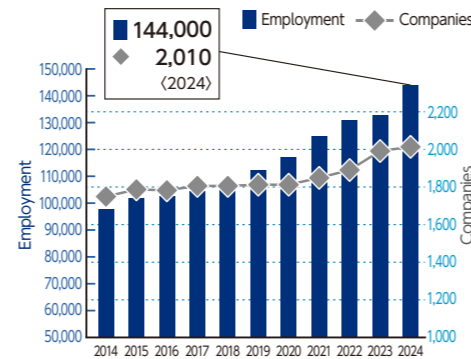

Economic ripple effects toward Yokohama City

| | |
|---------------------------------------|---------------------------|
| Effects of investment in construction | ¥3.4968 trillion (total) |
| Effects of city operation | ¥2.0846 trillion (annual) |

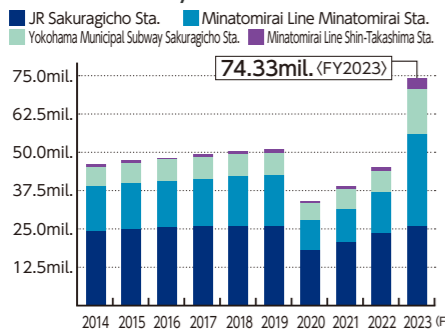

Transition of Visitors (Unit: Person)

Transition of Employment and Companies

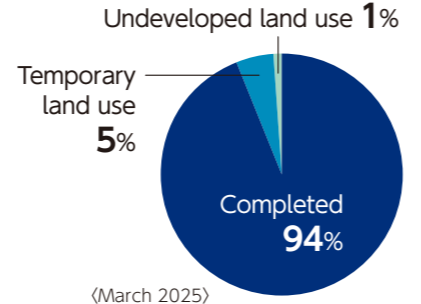

Numbers of Passengers Using Local Railway Stations

Land Usage

| | |
|--|-------|
| Buildings (offices, commercial, residential, etc.) | 87ha |
| Roads and railways | 42ha |
| Parks and greenery | 46ha |
| Port facilities | 11ha |
| Total | 186ha |

Progress of City Block Development

Theme③ Minato Mirai Art & Museum

An initiative to provide opportunities to make new discoveries and gain new insights in cooperation with corporate museums and art museums.

Maps that are useful for summer science projects by schoolchildren are distributed, and a project has been organized in which they can complete an illustrated book while touring the facilities.

Theme④ Carbon Neutrality

As a leading decarbonization area under the Ministry of the Environment, we are promoting various initiatives to achieve carbon neutrality together with the City of Yokohama and facilities in the district.

These include the introduction of renewable energy such as the installation of solar panels on rooftops, and "Bottle to bottle" horizontal recycling, in which used PET bottles are recycled into new PET bottles.
