MOU was signed between YWWB and three Vietnamese institutions

Yokohama

Water

Business

Association

The Yokohama Water Business Association (YWBA) was established in November 2011, and aims to utilize the technologies of Yokohama-based companies as well as the City's operational know-how in the field of water supply and sewerage systems for resolving water-related issues in developing countries.

The YWBA also supports member companies in expanding their businesses overseas.

YWBA member companies have been collaborating with the City of Yokohama to push ahead with technical cooperation and joint research.
